Professional Summary

Senior Flutter Engineer with 7+ years of professional software development experience and 6+ years specializing in Flutter, building high-performance, scalable, and production-grade mobile and web applications across Android, iOS, Web, and PWA platforms.

Strong expertise in Flutter architecture, performance optimization, state management, and cross-platform engineering, combined with a solid academic background in Artificial Intelligence and Computer Science. Experienced in designing maintainable systems with a strong focus on scalability, developer experience, and product quality.

Skilled in integrating AI-powered features and working with modern AI ecosystems, including AI agents, LLM-based workflows, automation pipelines, intelligent assistants, and AI-enhanced user experiences. Capable of bridging modern AI capabilities with robust mobile and cross-platform architectures.

Experienced in distributed international teams, long-term product ownership, and performance-critical environments.

Active open-source contributor with publicly available Flutter projects demonstrating clean architecture, reusable engineering patterns, performance-focused UI development, and maintainable production-level codebases.

Core Technical Skills

Mobile & Cross-Platform

Flutter, Dart, Android, iOS, Web, PWA

Architecture & Engineering

Clean Architecture, BLoC, MVVM, Modular Design, SOLID Principles

Scalable application architecture and maintainable codebases

State Management

BLoC, Riverpod, Provider

Performance Optimization

Rendering optimization, memory profiling, multithreading

Performance benchmarking and frame rendering optimization

AI & Intelligent Systems

AI agent integration and workflow orchestration
LLM-powered applications and AI-assisted experiences
Prompt engineering and AI automation concepts
Machine Learning fundamentals and applied AI concepts
AI-enhanced productivity and conversational systems

Languages & Tools

Dart, Python, Git, CI/CD
UX Engineering
Performance-driven UI development
Accessibility and responsive design
Smooth animations and interaction optimization
Open Source & GitHub Contributions
Active GitHub contributor with multiple public Flutter repositories demonstrating real-world application architecture and reusable engineering components
Designed and maintained scalable Flutter project templates following Clean Architecture and BLoC principles
Developed reusable UI components, utilities, and tooling focused on performance, readability, and long-term maintainability
Experimented with AI-enhanced workflows and developer productivity tooling
Contributions showcase strong Git workflow, documentation standards, and production-level code quality

Professional Experience

Senior Flutter Developer

Bit24 | Cross-Platform (Android, iOS, PWA)

Oct 2025 – Present

Key Achievements

Designed and enforced Clean Architecture combined with BLoC, significantly improving scalability, testability, and long-term maintainability
Established strict separation of concerns, enabling faster onboarding and safer feature development
Built a robust unit and integration testing structure, reducing regression risk in production releases
Collaborated on scalable frontend infrastructure for rapidly evolving product requirements
Contributed to improving engineering workflows and development efficiency
Senior Flutter Engineer & UX Developer

ParsPack
Apr 2021 – Sep 2025

Key Achievements

Doubled application performance, increasing frame rate from 60 FPS to 120 FPS for a noticeably smoother user experience
Reduced memory consumption by ~70% (from ~100 MB to ~30 MB), improving stability on low-end devices
Improved SEO score by 15% (70 → 80) through metadata optimization and web performance enhancements
Enhanced Flutter Web performance using HTML and WebAssembly (WASM) renderers for faster load times
Developed custom Flutter plugins and packages leveraging native Android and iOS APIs
Played a key role in improving UX consistency and responsiveness across mobile and web platforms
Participated in architecture-level technical decisions and performance-focused engineering initiatives

Arca Tose'e Pars Ryan
Nov 2020 – Jul 2021

Key Achievements

Improved application usability and responsiveness through WebSocket-based realtime communication
Integrated OpenStreetMap, enhancing location-based features and user interaction
Improved maintainability through modular Flutter development practices
Mobile Application Developer

Ava Pardaz Keyhan Kariman
Jun 2020 – Oct 2020

Key Achievements

Improved rendering performance by ~20% using Skia warm-up optimizations
Enhanced application responsiveness and runtime stability

Freelance Software Developer
Sep 2018 – Jun 2020

Key Achievements

Delivered multiple Flutter projects while building strong foundations in scalable mobile architecture

Open-sourced internal tools and reusable Flutter components

Designed polished, performance-aware UIs, strengthening UI/UX engineering fundamentals

Worked directly with clients to transform product requirements into production-ready applications

Education

Master of Science – Artificial Intelligence

Shiraz University | 2021 – 2024

Bachelor of Science – Computer Engineering

Shahid Bahonar University of Kerman | 2017 – 2021
