PROFESSIONAL SUMMARY

Senior Flutter Engineer with 7+ years of software development experience and 6+ years specializing in building scalable, high-performance cross-platform applications across Android, iOS, Web, and PWA platforms using Dart. Expert in Clean Architecture, state management (BLoC, Riverpod), and mobile performance optimization, successfully increasing frame rates and reducing memory consumption in production environments. Strong background in Artificial Intelligence (M.S. in AI) with practical experience integrating LLMs, AI agents, and intelligent workflows into mobile ecosystems. Proven ability to lead technical initiatives, enforce SOLID principles, and collaborate within distributed Agile teams to deliver maintainable, production-ready enterprise applications.

TECHNICAL SKILLS

Mobile & Cross-Platform: Flutter, Dart, Android, iOS, Web, PWA.

Architecture & Methodologies: Clean Architecture, BLoC, MVVM, Modular Design, SOLID Principles, Agile, Scrum, Kanban.

State Management: BLoC, Riverpod, Provider.

Backend, API & Testing: RESTful APIs, GraphQL, Firebase, Flutter Test, Mockito, Integration Testing.

DevOps & Deployment: Git, CI/CD, GitHub Actions, Bitrise, Fastlane, App Store Connect, Google Play Console.

Performance Optimization: Rendering optimization, memory profiling, multithreading, benchmarking.

AI & Intelligent Systems: AI agent integration, LLM-powered applications, prompt engineering, Machine Learning fundamentals.

PROFESSIONAL EXPERIENCE

Senior Flutter Developer | Bit24 | Oct 2025 – Present

- Designed and enforced Clean Architecture combined with BLoC, significantly improving scalability, testability, and long-term maintainability.
- Established strict separation of concerns, enabling faster onboarding and safer feature development.
- Built a robust unit and integration testing structure using Flutter Test and Mockito, reducing regression risk in production releases.
- Collaborated within Agile frameworks on scalable frontend infrastructure for rapidly evolving product requirements.
- Contributed to improving engineering workflows, CI/CD pipelines, and overall development efficiency.

Senior Flutter Engineer & UX Developer | ParsPack | Apr 2021 – Sep 2025

- Doubled application performance, increasing frame rate from 60 FPS to 120 FPS for a noticeably smoother user experience.
- Reduced memory consumption by ~70% (from ~100 MB to ~30 MB), improving stability on low-end devices.
- Improved SEO score by 15% (from 70 to 80) through metadata optimization and web performance enhancements.
- Enhanced Flutter Web performance using HTML and WebAssembly (WASM) renderers for faster load times.
- Developed custom Flutter plugins and packages leveraging native Android and iOS APIs.
- Played a key role in improving UX consistency and responsiveness across mobile and web platforms.
- Participated in architecture-level technical decisions and performance-focused engineering initiatives.

Software Developer | Arca Tose'e Pars Ryan | Nov 2020 – Jul 2021

- Reduced real-time data latency by over 30% and improved application usability through WebSocket-based communication.
- Integrated OpenStreetMap via RESTful APIs, enhancing location-based features and user interaction.
- Improved maintainability through modular Flutter development practices and code refactoring.

Mobile Application Developer | Ava Pardaz Keyhan Kariman | Jun 2020 – Oct 2020

- Improved rendering performance by ~20% using Skia warm-up optimizations.
- Enhanced application responsiveness and runtime stability across varied Android architectures.

Freelance Software Developer | Sep 2018 – Jun 2020

- Delivered 5+ end-to-end Flutter applications, building strong foundations in scalable mobile architecture and App Store deployment.
- Open-sourced internal tools and reusable Flutter components to streamline Agile development lifecycles.
- Designed polished, performance-aware UIs, strengthening UI/UX engineering fundamentals and client satisfaction.
- Worked directly with clients to transform product requirements into production-ready cross-platform applications.

OPEN SOURCE & GITHUB CONTRIBUTIONS

- Active GitHub contributor with multiple public Flutter repositories demonstrating real-world application architecture and reusable engineering components.
- Designed and maintained scalable Flutter project templates following Clean Architecture and BLoC principles.
- Developed reusable UI components, utilities, and tooling focused on performance, readability, and long-term maintainability.
- Experimented with AI-enhanced workflows and developer productivity tooling.
- Contributions showcase strong Git workflow, documentation standards, and production-level code quality.

EDUCATION

Master of Science - Artificial Intelligence | Shiraz University | 2021 – 2024
