PROFESSIONAL SUMMARY

Senior Flutter Engineer with over 7 years of software development experience, including 6+ years specializing in building scalable, high-performance cross-platform applications across Android, iOS, Web, and PWA platforms using Dart. Expert in Clean Architecture, state management (BLoC, Riverpod), and mobile performance optimization, with a proven track record of increasing frame rates and reducing memory consumption in production environments. Holds a Master of Science in Artificial Intelligence, offering unique practical experience integrating Large Language Models (LLMs), AI agents, and intelligent workflows into mobile ecosystems. Strong background in enforcing SOLID principles, optimizing CI/CD pipelines, and collaborating within distributed Agile teams to deliver production-ready enterprise solutions.

TECHNICAL SKILLS

Mobile & Cross-Platform	Flutter, Dart, Android, iOS, Web, PWA
Architecture & Design	Clean Architecture, BLoC, MVVM, Modular Design, SOLID Principles
State Management	BLoC, Riverpod, Provider
Backend & APIs	RESTful APIs, GraphQL, WebSockets, Firebase
Testing & Quality	Flutter Test, Mockito, Unit Testing, Integration Testing
DevOps & Deployment	Git, CI/CD, GitHub Actions, Bitrise, Fastlane, Google Play Console, App Store Connect
Performance Optimization	Rendering optimization, memory profiling, multithreading, benchmarking, WebAssembly (WASM)
AI & Intelligent Systems	AI Agent Integration, LLM-powered Applications, Prompt Engineering, Machine Learning

PROFESSIONAL EXPERIENCE

Senior Flutter Developer — Bit24	Oct 2025 – Present Tehran, Iran
- Architected and deployed a production-wide Clean Architecture and BLoC infrastructure, reducing code technical debt and accelerating developer onboarding times. - Established a strict separation of concerns across features, reducing regression risks during rapid deployments by 25%. - Built a robust automated testing suite using Flutter Test and Mockito, ensuring 80%+ test coverage on core financial transactions and features. - Collaborated within Agile frameworks to optimize CI/CD workflows, shortening sprint deployment cycles and enhancing cross-functional efficiency.	

Senior Flutter Engineer & UX Developer — ParsPack

Apr 2021 – Sep 2025 | Tehran, Iran

- Doubled application rendering performance, increasing the frame rate from 60 FPS to 120 FPS for a noticeably smoother user experience.
- Reduced application memory consumption by approximately 70% (from ~100 MB down to ~30 MB), significantly increasing application stability on low-end devices.
- Boosted platform SEO scores by 15% (from 70 to 80) through targeted metadata optimization and structural web performance enhancements.
- Enhanced Flutter Web load times and runtime execution by introducing HTML and WebAssembly (WASM) compiler renderers.
- Developed custom, reusable Flutter plugins and packages leveraging native Android and iOS APIs to bridge hardware capabilities.
- Collaborated on high-level architectural technical decisions, ensuring UX consistency and seamless responsiveness across both mobile and web viewports.

Software Developer — Arca Tose'e Pars Ryan

Nov 2020 – Mar 2021 | Tehran, Iran

- Reduced real-time data streaming latency by over 30% by refactoring legacy networking modules to bi-directional WebSocket-based communication.
- Integrated OpenStreetMap via RESTful APIs, enhancing location-based tracking features and user interactive maps.
- Improved codebase maintainability through modular Flutter development practices, breaking monolithic components into decoupled features.

Mobile Application Developer — Ava Pardaz Keyhan Kariman

Jun 2020 – Oct 2020 | Kerman, Iran

- Improved initial UI rendering performance by approximately 20% utilizing Skia shader warm-up optimizations to eliminate junk frames.
- Enhanced application responsiveness and runtime stability across varied Android operating system versions and device architectures.

Freelance Software Developer — Self-Employed

Sep 2018 – Jun 2020 | Remote

- Delivered 5+ production-ready end-to-end Flutter applications, managing the complete lifecycle from architectural design to App Store and Google Play deployment.
- Designed polished, performance-aware interfaces using deep UI/UX engineering fundamentals to maximize client and user satisfaction rates.
- Worked directly with business stakeholders to translate complex product requirements into scalable cross-platform software systems.

PROJECTS & GITHUB CONTRIBUTIONS

- **Flutter Clean Architecture Boilerplate:** Designed and open-sourced a production-ready project template utilizing BLoC and Clean Architecture principles, helping developers jumpstart scalable applications.
- **AI Mobile Ecosystem Integrations:** Experimented with and published repositories showcasing AI-enhanced developer workflows, custom LLM prompts, and automated mobile agent utilities.
- **Custom UI Kit:** Developed and maintained an open-source library of reusable, performance-optimized UI components focused on accessibility and fluid 120 FPS transitions.

EDUCATION

Master of Science in Artificial Intelligence — Shiraz University	2021 – 2024
Bachelor of Science in Computer Engineering — Shahid Bahonar University of Kerman	2017 – 2021
